

BUILDING AND FLYING INSTRUCTIONS:

Note: Read these instructions carefully before starting actual construction! Study the plans and become familiar with the parts and how they fit together in the completed model.

Turn to Die-Cut Sheet 1/8" is a sleek, high speed flying aircraft. Its design is based on the characteristics of the prototype DeHavilland Beaver. The details on the construction of the model are based on the prototype's design. Since the prototype is a high wing monoplane, the model is also a high wing monoplane. The model is a scale model of the prototype and has all the characteristics of the prototype. It is not a flying model, but it is a flying model. It is not a flying model, but it is a flying model. It is not a flying model, but it is a flying model
