

designed and drawn by MobileMenice80 1 of 2

horns and fire wall were made from $\frac{3}{32}$ " ply and the wire hole was drilled with a #60 drill bit
long horns were used for the aile and rudder and the shorter ones used for the ele.

$\frac{1}{8}$ " carbon spar is 24" long in the main wing and 9.5" long in the elevator..(not shown)

also not shown are 2 pieces of flat carbon 7mm x 1mm along the side tail section that cut i" into the wing and the elevator surfaces

plans are printed 22x36
